

Healthy Pets 4 Life

Because we care!

Did you know that dogs and cats age at a MUCH faster rate than we do? This is both good and bad! We only have to worry about teenage month's, not teenage years, but our beloved furry family will be born, grow up, grow old and pass on before we do. So of course we want to make sure that our furry family will be with us as long as possible.

To this end we at Busselton Veterinary Hospital want to introduce you to our new program.

To ensure that my Frankie stays healthy, he comes in for a wellness consultation TWICE a year for life. At each visit he has a full physical examination plus blood or urine testing (or both) to examine him on the inside where we cannot see. By checking him out regularly I can relax when no problems are found or investigate and treat him MUCH EARLIER if something isn't quite right. I don't want to wait until something drastic happens!

As he gets older he will get tested more thoroughly each time.

I want peace of mind knowing that I am doing everything I can to keep Frankie in great shape and good health. I want him around for as long as possible!

**Healthy Pets for Life** includes ALL first consultations for the entire year, annual vaccinations as required, the appropriate wellness testing and 4 hydrobaths per year PLUS all *Healthy Pets for Life* will get a 20% discount off a full parasite control package designed to suit your lifestyle, as well as a 20% discount off 1 dental cleaning per year.

\* *First Consultations* means the first presentation for a new problem. Recheck or repeat consultations are charged when required. Excludes After-Hours consultations.

We start with **Adolescent**, then progress through **Adulthood**, to **Senior Years** and finally to the **Golden Oldies**.

Many more diseases develop in older age so more testing is needed the older our pets get. With our range of modern in-house laboratory equipment we will have the results for you the same day. Then you can relax knowing your furry friend is happy and healthy, or we can discuss ways to help get them back on track.

**Keeping our furry friends healthy with wellness testing ensures everyone can have a good night's sleep!**

Life Stage	Services Included	Saving
Adolescent	6 monthly Wellness Exams, First Consultations*, Mini Bloods on 1st Wellness visit,  Urine Dipstick on 2nd Wellness visit Annual Vaccinations when due, PLUS 4 hydrobaths per year	\$120+
Adulthood	6 monthly Wellness Exams, First Consultations*, Adult Bloods + Urine SG on 1st Wellness Visit, Urine Dipstick + ERD on 2nd Wellness Visit, Annual Vaccinations when due, PLUS 4 hydrobaths per year	\$130+
Senior Years	6 monthly Wellness Exams, First Consultations*, Senior Bloods + Urine SG on 1st Wellness Visit, Urinalysis + ERD on 2nd Wellness Visit, Annual Vaccinations when due, PLUS 4 hydrobaths per year	\$140+
Golden Oldies	6 monthly Wellness Exams, First Consultations*, Geriatric Bloods, Thyroid test + Urinalysis on 1st Wellness Visit, 6monthly Bloods, Urinalysis + ERD on 2nd Wellness Visit, Annual Vaccinations when due, PLUS 4 hydrobaths per year	\$155+

Savings calculated against full cost of included items, based on 2 consultations per year and 1 vaccination per year. Vaccinations DO NOT include a full puppy or kitten course or FIV vaccinations. Increased savings will occur if more first consultations are made.

## So how do we know how old our pets are?

A rough guide that has often been quoted is that 1 human year is equivalent to 7 dog or cat years.

The following chart has been adapted from an IDEXX laboratories chart, (IDEXX supply our in-house laboratory machines). The different life stages are in different colours and dogs are divided based on their adult body weight.

We must all still remember that this is only a guide.

Adolescent Years, Adulthood Years, Senior Years, and Golden Oldies Years.

Age	Cats	Dogs			
		0-10kg	10-25kg	25-40kg	>40kg
1	7	7	7	8	9
2	13	13	14	16	18
3	20	20	21	24	26
4	26	26	28	31	34
5	35	35	36	38	41
6	40	40	42	45	49
7	44	44	47	50	56
8	48	48	51	55	64
9	52	52	56	61	71
10	56	56	60	66	78
11	60	60	65	71	86
12	64	64	69	77	93
13	68	68	74	82	101
14	72	72	78	88	108
15	76	76	83	93	115
16	80	80	87	99	123
17	84	84	92	104	131
18	88	88	96	115	139
19	92	92	101	120	
20	96	96	105	126	
21	100	100	109	130	
22	104	104	113		

Thank you for taking the time to read our information handout, this is aimed at helping you understand how important we think it is to maintain wellness rather than just cure illness.

At Busselton Vet Hospital we believe in doing everything we can to ensure your pet has the benefits of modern veterinary medicine in a caring and friendly environment.

So what is our Wellness Plan?
